Next.JS'e Göz Atalım

Furkan PORTAKAL
Frontend Developer / Protel

A JavaScript library for building user
interfaces

1- Declarative

Declarative VS Imperative

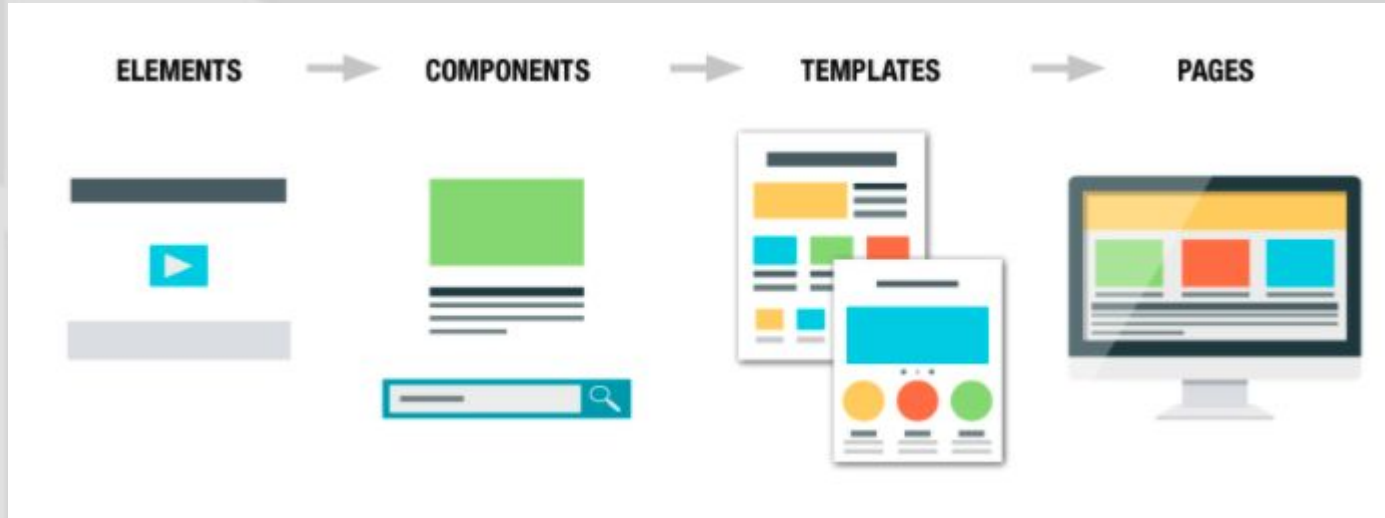

What you want to do

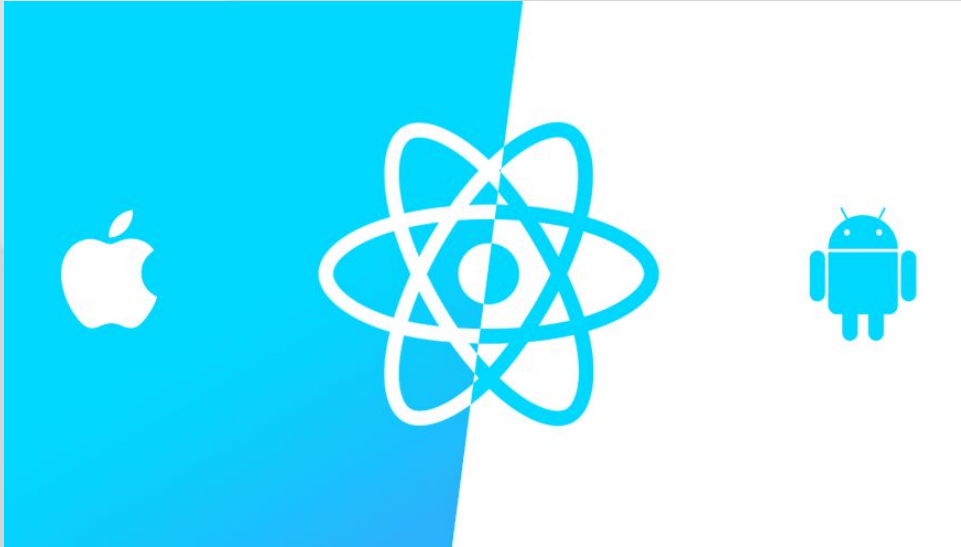

How you want to do a task

2- Component-Based

3- Learn Once, Write Anywhere

Community

React vs Next.js

GitHub Data

React

Why should we compare them?

 Fun and easy to use

 Seo and Performance

 Features

- Pre-rendering
- Automatic build size optimization
- Faster development compilation
- Server-side rendering (SSR)

SSR

CSR

The React Framework
for Production

Next.js is built on top of React to make development easier

Why Next.js

- 🌟 Image Optimization
- 🌟 Internationalized Routing (i18n)
- 🌟 Fast Refresh
- 🌟 File-system Routing
- 🌟 API Routes
- 🌟 Code-splitting and Bundling

Let's examine the project code
